

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

Unity and Diversity: Central Europe Through The Centuries

The course developed within the ReCall Project

The "Recall Microcourse" is an innovative educational initiative aimed at fostering a shared understanding of Central European history, culture, and memory. Through collaboration among experts from Hungary, Poland, and the Czech Republic, the project connects diverse historical perspectives and cultural narratives to explore the region's complex past. This online course leverages modern digital tools and interactive learning methods to engage students, researchers, and history enthusiasts alike.

The curriculum covers 15 distinct topics, focusing on pivotal historical events, cultural milestones, and political transformations that have shaped Central Europe. Emphasizing the interconnectedness of the region's history, the course also highlights the unique trajectories of individual nations. By combining expert insights with interdisciplinary approaches, the microcourse not only expands historical knowledge but also cultivates critical thinking skills essential for understanding complex historical and societal contexts.

Hosted on a state-of-the-art digital platform, the course offers a flexible and accessible learning environment. Each module includes expert-led video lectures, interactive quizzes, downloadable resources, and multilingual subtitles, ensuring inclusivity and accessibility for a diverse audience. The platform's interactive features encourage active participation, fostering a deeper engagement with the material.

The "Recall Microcourse" serves as both an educational resource and a platform for cultural dialogue. By bridging national perspectives and embracing innovative teaching methods, it aims to enhance learners' understanding of Central European history while promoting international collaboration and digital education innovation.

1. Introduction and objectives

The Recall project focuses on fostering a shared understanding of Central European history, culture, and memory through innovative educational methods. This microcourse is designed to bring together diverse perspectives from Hungary, Poland, and the Czech Republic to address key historical topics. By combining digital tools and expert insights, the course seeks to engage students, researchers, and the broader audience in exploring main moments that shaped the region.

The 15 topics selected for this course are rooted in the historical, cultural, and political experiences of Central Europe. Each topic highlights the interconnectedness of the region while offering a unique lens to understand its evolution. These include foundational myths,

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

social and political transformations, and cultural milestones that resonate across national borders.

Primary goals:

The Recall microcourse is built on a set of primary goals designed to create a meaningful and impactful educational experience while fostering international collaboration and digital innovation. At its core, the course aims to enhance historical understanding by providing an interdisciplinary approach to exploring Central European history. By integrating perspectives from Hungary, Poland, and the Czech Republic, it encourages learners to critically analyze historical narratives and reflect on the role of memory politics in shaping cultural and national identities. This reflective approach not only deepens knowledge but also cultivates critical thinking skills essential for understanding complex historical contexts.

Another fundamental goal is to promote international collaboration. The project strengthens partnerships between academic institutions in the three participating countries, building bridges between experts, students, and educators. By leveraging cross-border expertise, the course creates engaging and accurate educational materials that highlight the interconnectedness of Central European history. This collaborative approach ensures that the course reflects a balanced and comprehensive perspective on shared historical experiences.

The utilization of digital education is a cornerstone of the Recall microcourse. A dedicated e-learning platform hosts the course, making it accessible to a wide audience. The platform features interactive content, including professionally produced videos, quizzes, and slide-based presentations, designed to engage learners and facilitate active participation. By embracing digital tools, the course provides a modern and flexible learning environment that meets the needs of contemporary students.

Finally, the project seeks to foster active learning by encouraging meaningful participation. E-learning exercises, webinars, and international study meetings offer dynamic opportunities for students to engage with the material, collaborate with peers, and contribute to discussions. Additionally, students are actively involved in evaluating the course, providing feedback that shapes its development and ensures its relevance. This participatory approach not only enriches the learning experience but also empowers students to take an active role in their education.

Through these interconnected goals, the Recall microcourse serves as both an academic resource and a platform for cross-cultural dialogue, helping learners develop a nuanced understanding of Central European history while promoting international cooperation and the use of innovative educational practices.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

Course framework:

The ReCall microcourse is designed with a comprehensive framework to ensure a seamless and enriching learning experience for participants. Central to the course are 15 video modules, each dedicated to a distinct topic of Central European history and culture. These videos are produced in English and supplemented with subtitles in Hungarian, Czech, and Polish to maximize accessibility for a diverse audience. Each module is further enriched by complementary resources, including detailed presentations and interactive e-learning tests, which are designed to encourage deeper engagement with the material and reinforce key concepts.

The delivery of the course content is carefully planned to maintain high academic and technical standards. Videos will be prepared by expert teams from Hungary, Poland, and the Czech Republic, who bring their specialized knowledge to the project. The Hungarian team will coordinate the production process, providing a professional video crew to ensure the recordings are of consistent quality across all locations. This attention to detail extends to post-production, where videos are edited to maintain clarity, coherence, and a unified visual style.

To make the course widely accessible, all materials will be hosted on an e-learning platform, proposed as **spacewize.io**. This platform is tailored to support flexible learning, allowing students to engage with the content at their own pace. Its user-friendly interface and interactive features provide a dynamic and responsive educational environment, catering to the needs of modern learners.

Beyond the technical aspects, the course framework emphasizes inclusivity and interactivity. The integration of subtitles in multiple languages ensures that language barriers do not hinder learning, while the addition of quizzes and supplementary materials allows learners to engage actively with the content. By combining expert-driven video production with a robust digital delivery system, the Recall microcourse framework establishes a strong foundation for achieving its educational objectives.

Content areas:

Name of the topic	Responsible
1. The story of the beginning	CZ
2. The patrons and guardians of the land	HU

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

 3.	2023-1-HU01-KA220-HED-000154286
The myth of national disaster	CZ
4. Creation of the modern states (1918-1920)	PL
5. The emancipation of women	CZ
6. The emancipation of minorities	HU
7. The Holocaust	CZ
8. Dreaming about the democracy	PL
9. Back to Europe together	HU
10. Religious tolerance and intolerance	PL
11. Transfer of the culture	CZ
12. Pandemics	PL
13. Legacy of the Jagiellonians and Habsburgs dynasties	HU
14. Culture against communism	PL
15. Revolutions of 1848	HU

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

By combining these thematic areas with innovative teaching methods, the course will empower participants to explore the shared and divergent paths of Central European history, fostering a deeper understanding of the region's complexities

2. Course structure

The Recall microcourse is designed to provide a comprehensive and engaging exploration of Central European history, culture, and memory. It consists of 15 video modules supported by supplementary materials, interactive learning exercises, and collaborative tools. The structure ensures that learners can engage with the material flexibly while benefiting from diverse perspectives provided by experts from Hungary, the Czech Republic, and Poland.

The Recall microcourse offers a structured, comprehensive approach to exploring Central European history, culture, and memory, providing learners with an engaging and accessible educational experience. Comprising 15 meticulously designed video modules, the course delves into critical aspects of the region's past and its enduring relevance to contemporary society. Each module is enriched with supplementary materials and interactive tools, creating a dynamic learning environment that accommodates diverse perspectives and encourages active engagement.

At the heart of the course are the video modules, each dedicated to a specific topic curated to highlight main moments, cultural milestones, and historical transformations in Central Europe. The topics were carefully selected to address the interconnectedness of Hungary, the Czech Republic, and Poland, while also examining how these nations' histories resonate within broader European contexts.

The proposed title of the course is **Unity and Diversity: Central Europe Through The Centuries**

Course modules:

Each video lecture is professionally recorded, with a duration of 30-35 minutes, and features presentations by subject-matter experts from the country responsible for the given topic. To enhance accessibility, all videos are subtitled in English, Hungarian, Czech, and Polish, ensuring a wide reach among learners with varying language proficiencies. These multilingual subtitles also make the content inclusive, catering to audiences from diverse backgrounds.

Accompanying the video lectures are slide-based presentations, which visually highlight the core ideas discussed in the videos. These presentations are designed to provide clarity and to aid understanding by distilling complex topics into concise, visually appealing elements. Learners also benefit from complete English transcripts of the video lectures, which facilitate note-taking, referencing, and a deeper engagement with the material.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

Interactive e-learning tests further enhance the educational experience by reinforcing key concepts covered in each module. These tests include a variety of question formats, such as multiple-choice, true/false, and open-ended reflections, encouraging learners to critically engage with the content. By integrating these assessments, the course fosters active learning and ensures that participants not only absorb information but also apply and reflect on their understanding.

This carefully crafted course structure combines academic rigor with innovative digital tools, offering a flexible, inclusive, and enriching learning journey. By presenting expert insights in a user-friendly format and incorporating interactive elements, the Recall microcourse empowers learners to explore the complexities of Central European history while developing critical thinking and analytical skills.

Delivery format:

The Recall microcourse is delivered through a purpose-built e-learning platform, overseen by the Hungarian team, which ensures a seamless and interactive learning experience. This platform is designed to cater to diverse learner needs, combining flexibility with engaging features that promote active participation and deeper understanding. Its robust capabilities enable the course to be both accessible and engaging, fostering a dynamic educational environment.

The platform offers on-demand access, allowing learners to progress through the modules at their own pace. This flexibility is essential for accommodating varied schedules and learning preferences, making it ideal for both students and professionals. Whether accessed on a desktop, tablet, or smartphone, the platform ensures a consistent and user-friendly experience across devices.

Interactive features further enrich the learning journey. Each module includes integrated quizzes that test comprehension and encourage critical reflection on the content. Discussion boards facilitate peer-to-peer interaction, enabling learners to share insights, debate ideas, and build a sense of community. Real-time feedback tools, such as instant quiz results and comment sections, provide learners with immediate insights into their progress and areas for improvement, fostering a sense of achievement and motivation.

To support self-paced learning and offline study, the platform provides a variety of downloadable resources. Learners can access detailed presentations that visually complement the video content, full transcripts of lectures for easy reference, and curated additional reading materials that delve deeper into the topics. These materials are ideal for learners who wish to expand their knowledge or review concepts at their convenience.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

Suggestions for additional downloadable materials:

1. **Study guides:** Summarized key points and concepts for each module, helping learners to review and prepare for assessments effectively.
2. **Glossaries:** Lists of important terms and definitions related to Central European history and culture to clarify complex topics.
3. **Annotated bibliographies:** A curated list of academic articles, books, and online resources for further reading, complete with annotations that describe their relevance to the course.
4. **Infographics and timelines:** Visual aids that present historical events, cultural developments, and other relevant data in an engaging format.
5. **Case studies:** Downloadable examples of specific events or phenomena discussed in the course, encouraging practical application of the material.

Suggestions for uploaded assignments and tasks:

1. **Reflection journals:** Learners submit brief reflections on what they’ve learned from each module, encouraging personal engagement and critical thinking.
2. **Group projects:** Collaborative tasks where learners analyze a shared historical event or cultural theme, fostering teamwork and cross-cultural understanding.
3. **Scenario-based quizzes:** Problem-solving tasks where learners apply their knowledge to hypothetical situations rooted in Central European history.
4. **Peer review exercises:** Opportunities for learners to evaluate each other's work, enhancing critical thinking and fostering a community of shared learning.
5. **Connection with the interactive map:** Tasks where learners contribute to or analyze our dynamic map, visualizing historical and cultural developments.

By integrating these downloadable resources and interactive tasks, the platform ensures a rich and versatile learning experience. This multifaceted approach not only engages learners but also equips them with tools to critically explore and appreciate the complexities of Central European history and culture.

Timeline and workflow:

The course development process follows a structured timeline to ensure timely delivery of high-quality content.

- Phase 1: Topic Research and Preparation (2024)
 - Teams finalize topic descriptions and develop outlines for their respective modules.
 - Scripts for video lectures and presentations are submitted by each country.
- Phase 2: Video Production (Early 2025)
 - Videos are recorded over two days in each country, coordinated by the Hungarian team.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

- Raw footage is sent for editing and subtitling.
- Phase 3: Content Integration (Mid 2025)
 - Edited videos, presentations, and transcripts are uploaded to the e-learning platform.
 - E-learning tests are finalized and integrated into the platform.
- Phase 4: Testing and Piloting (Late 2025)
 - The course is tested during international study meetings and by 15 participants from each country.
 - Feedback is collected and used to refine the course before its official launch.

Learning outcomes:

The Recall microcourse is carefully designed to achieve a set of comprehensive learning outcomes, ensuring that participants gain both knowledge and critical skills through their engagement with the course materials. Each module is structured not only to impart factual understanding but also to foster analytical thinking and meaningful reflection on the complexities of Central European history. By the end of the course, learners will be well-equipped to connect historical narratives with broader cultural and political contexts, engage in informed discussions, and apply their insights to contemporary issues.

The primary goal of the microcourse is to provide participants with a deep understanding of the historical and cultural development of Central Europe, exploring how events, traditions, and movements have shaped the region over centuries. By examining topics ranging from the formation of modern states to the impact of revolutions and the role of religion, learners will acquire a nuanced perspective on Central Europe’s unique and shared historical trajectories.

A key focus of the course is to highlight cross-national connections and shared heritage within the region. By emphasizing the interplay between Hungary, Poland, and the Czech Republic, the modules showcase how the histories of these nations are interwoven, transcending national borders to form a collective identity. This approach encourages learners to appreciate the collaborative and often complex dynamics of the region’s past.

The course also aims to encourage critical analysis of historical narratives and memory politics. Learners will explore how history has been interpreted, commemorated, and sometimes contested across different eras and political contexts. This critical approach helps participants question assumptions, evaluate sources, and understand the implications of how history is remembered and represented.

Finally, the microcourse seeks to equip learners with practical knowledge and tools to participate in informed discussions on Central European history. Through interactive exercises, assignments, and guided analyses, learners will develop the confidence to articulate their insights, contribute to debates, and apply their understanding to broader societal and cultural discourses.

Suggested specific learning outcomes:

1. **Historical analysis:**
 - Identify and explain the major historical events and cultural developments in Central Europe’s history.
 - Evaluate the role of historical figures, movements, and ideologies in shaping the region.
2. **Comparative perspectives:**
 - Compare and contrast the historical trajectories of Hungary, Poland, and the Czech Republic.
 - Recognize the interconnectedness of national histories and their contributions to regional identity.
3. **Critical thinking:**
 - Analyze primary and secondary sources critically, identifying biases and differing interpretations.
 - Assess the impact of memory politics on contemporary cultural and political debates.
4. **Cultural awareness:**
 - Understand and appreciate the cultural and religious diversity within Central Europe.
 - Examine how cultural exchanges and shared heritage influence modern European identity.
5. **Practical application:**
 - Participate in informed discussions, presenting arguments based on evidence and critical analysis.
 - Apply historical insights to understand current issues in regional and European contexts.
6. **Global contextualization:**
 - Relate the history of Central Europe to broader European and global developments, such as colonialism, industrialization, and globalization.
 - Understand the role of Central Europe within the European Union and its contributions to European integration.

By achieving these outcomes, learners will not only deepen their understanding of Central European history but also develop transferable skills in critical thinking, cultural analysis, and effective communication, ensuring their learning experience extends beyond the course itself.

Technical requirements and methodology:

The success of the Recall microcourse relies on both its technical infrastructure and the rigorous methodology guiding its development. To deliver a seamless and engaging learning

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

experience, the course integrates advanced technical features with a well-defined, multi-phase development process that ensures the content is not only academically enriching but also user-friendly and accessible.

A critical component of the course’s delivery is its technical accessibility. The platform hosting the microcourse is designed to be fully mobile-friendly, enabling participants to engage with the materials on various devices, including smartphones, tablets, and desktop computers. This adaptability ensures learners can access the content anytime and anywhere, fostering flexibility and convenience.

To support the multimedia-rich nature of the course, a stable internet connection is essential for streaming the professionally produced video lectures and engaging with interactive features such as quizzes, discussion boards, and downloadable resources. Recognizing the importance of user guidance, the platform will provide clear, step-by-step instructions on navigation and functionality, ensuring learners can fully utilize its features. Additionally, technical support will be readily available to address any issues participants may encounter, guaranteeing a smooth and frustration-free experience.

The development of the Recall microcourse is a collaborative effort that follows a carefully structured, multi-phase methodology to ensure the highest standards of academic rigor and technical execution. The process begins with collaborative planning, where project teams from Hungary, Poland, and the Czech Republic work together to outline the course’s objectives, content, and structure. This phase emphasizes harmonizing perspectives to ensure the course reflects the diverse historical and cultural narratives of Central Europe.

The next phase focuses on scriptwriting, where subject-matter experts prepare detailed scripts for each video module. These scripts undergo rigorous review to ensure clarity, accuracy, and alignment with the course’s learning outcomes. This iterative process involves feedback from project teams and students, ensuring the content is both academically robust and engaging for the target audience.

Following the scriptwriting phase, video production begins. Professional filming takes place in Hungary, Poland, and the Czech Republic, with each country responsible for the topics assigned to its experts. The Hungarian team coordinates the technical aspects of video production, ensuring consistency in quality and style across all modules. Post-production editing ensures the final videos are visually polished and synchronized with the accompanying subtitles.

After production, the course enters the feedback and refinement phase, where the materials are reviewed and tested. This includes piloting the course with a select group of students to gather insights into user experience and content effectiveness. Their feedback informs final adjustments, ensuring the course meets the highest standards before its official launch.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

This structured methodology not only guarantees a high-quality educational resource but also ensures the course is responsive to the needs of its diverse audience. By combining advanced technical features with a collaborative and iterative development process, the Recall microcourse delivers an innovative and accessible learning experience that bridges the past and present of Central Europe.

The Recall Microcourse project involves the production of 15 high-quality video modules, each lasting approximately 30–35 minutes. These videos will follow a studio-like format, recorded at static locations with minimal movement, ensuring a professional and academic tone. The chosen filming environments will be relevant to the subject matter, such as libraries or study rooms, providing a visually appropriate backdrop. These settings must also meet strict requirements for quietness and soundproofing to eliminate background noise. The Hungarian Team will oversee site inspections to confirm their suitability.

Filming will take place in three key locations: **Budapest**, **Brno**, and **Wrocław**. Each location has been allocated two full days of recording to accommodate potential delays, multiple contributors, and logistical adjustments. In total, the production schedule spans six days, starting in Budapest. This allows for early identification and resolution of any technical or logistical challenges. Across all locations, the net recording time required will consist of five 20-minute segments and ten 5-minute segments, amounting to a total of 450 minutes of raw footage.

Post-production will focus on maintaining a consistent and unified style across all videos. Introductory and closing segments will include branding elements such as project codes and sponsor logos. Subtitles will be generated using the AI-powered alrite.io software, with translations available in English, Hungarian, Czech, and Polish, ensuring accessibility for a diverse audience. Presenters will use licensed PowerPoint templates from Envato Elements to deliver their lectures. Hungarian Team will manage the licensing process, ensuring professional and visually appealing presentations. All images incorporated into the slides must be properly attributed, and raw image files will be collected to ensure source transparency.

To support presenters during recording, teleprompters will be provided, ensuring a smooth and confident delivery. The standardized approach includes professional editing during post-production, where unnecessary content will be trimmed, visual aids such as infographics and animations will be incorporated, and subtitles will be synchronized for clarity. This process ensures a polished final product.

The production process will be meticulously planned, beginning with script preparation and the selection of visual materials by presenters. Filming will commence in Budapest, followed by sessions in Brno and Wrocław. Each video will undergo a rigorous post-production review to ensure it aligns with the project’s educational and technical standards before being finalized for distribution.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

Content creation

The content creation process for the Recall microcourse is a meticulously planned phase that ensures each module is educationally robust, engaging, and accessible to a diverse audience. This phase involves the collaborative efforts of expert teams from Hungary, Poland, and the Czech Republic, who develop the core materials that form the foundation of the course.

Video scripts and presentations

The creation of video scripts is a critical step in the content development process. Each team is responsible for preparing comprehensive scripts for their assigned topics. These scripts are meticulously crafted to include clear learning objectives, guiding learners through the essential themes and concepts of each module. Additionally, the scripts outline key discussion points and include engaging narratives that resonate with the audience, helping to contextualize complex historical and cultural events.

Complementing the scripts, teams also prepare visually engaging slide-based presentations. These presentations are designed to work seamlessly with the video content, offering a visual reinforcement of the topics covered. The slides include carefully curated images, charts, timelines, and other visual aids that simplify complex ideas, making them accessible and easier to grasp for learners at all levels. By combining narrative depth with visual clarity, the video scripts and presentations create a holistic learning experience.

E-learning tests

To reinforce the content delivered in the videos and presentations, each module includes interactive e-learning tests. Developed collaboratively by the teams, these tests feature a variety of question formats, such as multiple-choice questions, matching activities, and reflective prompts. These exercises are designed not only to assess comprehension but also to stimulate critical thinking and deeper engagement with the material.

The interactive nature of these tests allows learners to actively participate in the learning process, rather than passively consuming information. Furthermore, the inclusion of immediate feedback mechanisms enables learners to understand their strengths and identify areas for improvement in real time. This approach enhances the overall effectiveness of the course by providing a dynamic and responsive learning environment.

Additional enhancements

To further enrich the content creation process, teams can incorporate supplementary elements such as:

- **Case studies:** Real-world examples that illustrate the application of historical and cultural concepts discussed in the modules.

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

- **Primary source analysis:** Incorporating excerpts from historical documents, speeches, or visual archives to provide learners with hands-on experience in analyzing original materials.
- **Cross-Topic connections:** Highlighting links between different modules to demonstrate the interconnectedness of Central European history and culture.

By integrating these elements into the content creation process, the Recall microcourse ensures that learners not only gain knowledge but also develop the skills to critically analyze and apply what they have learned. This comprehensive approach to content creation solidifies the course's position as a meaningful and impactful educational resource.

Video production

The video production process for the Recall microcourse is designed to create professional, engaging, and accessible content that reflects the collaborative efforts of Hungary, Poland, and the Czech Republic. This phase ensures that each module is visually appealing, technically polished, and aligned with the educational objectives of the course.

Each video module is recorded on-site in pre-arranged locations across the three participating countries, providing an authentic backdrop that reflects the regional diversity and cultural significance of the topics. Professional camera crews, coordinated by the Hungarian team, ensure high-quality filming that captures both the content and the essence of each location. The process is carefully planned, with two days allocated for filming in each city, allowing for efficient use of resources while maintaining attention to detail. Experts and presenters are guided during the filming process to ensure clear delivery and engaging presentations.

Accessibility is a cornerstone of the production process, ensuring that the content is inclusive and reaches a wide audience. The Hungarian team is responsible for preparing English subtitles for all videos, which are subsequently translated into Hungarian, Czech, and Polish. These subtitles are integrated seamlessly into the videos, allowing learners to follow along in their preferred language. By offering multilingual options, the course removes language barriers and enhances comprehension for diverse learners, making the material accessible to a broader demographic.

Post-production is a meticulous process aimed at enhancing the visual and educational quality of the videos. Professional editing includes trimming unnecessary content, incorporating visual aids such as infographics and animations, and ensuring that subtitles are perfectly synchronized with the audio. The editing process also focuses on maintaining a consistent style and tone across all videos to create a cohesive learning experience.

Before finalizing, each video undergoes a rigorous quality assurance check to ensure clarity, coherence, and technical accuracy. This process includes verifying the synchronization of subtitles, ensuring the audio and visuals meet professional standards, and confirming that the content aligns with the learning objectives of the course. Feedback from the project team is

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

incorporated during this phase to address any remaining issues and ensure the videos meet the highest standards of educational quality.

To maximize engagement, the videos incorporate dynamic visuals such as maps, timelines, and historical photographs. These elements complement the spoken content and help learners visualize complex concepts. Background music and sound effects are used judiciously to maintain attention and create a polished final product, while ensuring that they do not detract from the educational focus.

The videos are designed to remain relevant and reusable beyond the duration of the project. By focusing on timeless themes and professional production, the content can serve as a valuable resource for future educational initiatives. The multilingual subtitles and modular format make it easy to update or adapt the videos for different audiences or platforms.

By combining professional recording, accessibility measures, and rigorous quality assurance, the video production process ensures that the Recall microcourse delivers engaging, inclusive, and high-quality educational content to learners across Central Europe and beyond.

Digital integration:

The Recall microcourse is supported by a state-of-the-art e-learning platform, managed by the Hungarian team, ensuring a seamless digital experience for all participants. This platform serves as the central hub for accessing all course materials, fostering interactive and self-paced learning.

The platform hosts a comprehensive suite of resources, including video lectures, accompanying presentations, full transcripts, and interactive tests. These materials are carefully organized into modules to ensure logical progression through the course. Additionally, the platform incorporates advanced features designed to enhance learning outcomes:

- **Progress tracking:** Learners can monitor their advancement through the course, receiving updates on completed modules and pending assignments.
- **Discussion forums:** Interactive forums provide a space for learners to engage in peer-to-peer discussions, exchange insights, and seek clarification from instructors.
- **Automated feedback:** Quizzes and tests are equipped with automated feedback mechanisms, enabling learners to understand their mistakes and reinforce their knowledge immediately.

To cater to a diverse audience, the platform is optimized for both desktop and mobile devices, ensuring accessibility across a range of technologies. Its intuitive design prioritizes user experience, with the following key features:

„RECALL: A Study of Central European Places of Memory for Collective Remembrance”

2023-1-HU01-KA220-HED-000154286

- **Clear navigation:** A well-structured menu and search functions allow learners to quickly locate specific modules or resources.
- **Step-by-Step instructions:** Detailed user guides and tutorials are provided to help participants familiarize themselves with the platform’s tools and functionalities.
- **Accessibility features:** Adjustable font sizes, alternative text for images, and compatibility with screen readers ensure inclusivity for learners with disabilities.

The e-learning platform is equipped with supplementary tools to support diverse learning styles and enhance engagement:

- **Gamification elements:** Features like achievement badges and leaderboards encourage active participation and sustained motivation.
- **Downloadable resources:** Learners can access downloadable PDFs of presentations and supplementary readings for offline study.
- **Multilingual support:** Content is available in multiple languages, with subtitles and transcripts ensuring a wide reach.

By integrating these digital features, the Recall microcourse leverages technology to provide an engaging, accessible, and efficient learning environment. This robust digital infrastructure not only facilitates knowledge acquisition but also fosters a collaborative and inclusive educational experience.
